-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restriction

1. An election of claims 1-3 and 6 is acknowledged. The limitations recited in claims 4 and 5 are patentably distinct from limitations recited in claims 2-3.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Gomi et al (US 6822706).

Gomi an electro-optical panel comprising (see at least Figure 5): a first substrate 102; a second substrate 101 adhered to the first substrate with a sealant; an electro-optical substance 100 sandwiched between an inside surface of the first substrate and an inside surface of the second substrate; and a third substrate 108 disposed above the outer side of at least one of the first substrate and the second substrate, the size of the third substrate being larger(longer) than the size of the first substrate, the position of the end surface of the first substrate being disposed inwardly of the third substrate, and a shielding member 109 being disposed on the third substrate, along the peripheral region of the third substrate.

Art Unit: 2871

Gomi discloses the surface of the first substrate being adhered to the surface of the third substrate with adhesive (inherent, see at least Figure 5).

Allowable Subject Matter

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art an electro-optical panel comprising a combination of various elements as claimed, more specifically, the incident light from the third substrate side traveling through the first substrate and being emitted from the second substrate, and the light shielding member overlapping the sealant and extending outward over the sealant as viewed in plane.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
